

ARTIFICIAL INTELLIGENCE
VOLUME 51, NUMBERS 1-3, OCTOBER 1991

SPECIAL VOLUME
QUALITATIVE REASONING ABOUT PHYSICAL SYSTEMS II

CONTENTS*

<i>B.C. Williams and J. de Kleer</i> Qualitative reasoning about physical systems: a return to roots	1
<i>O. Raiman</i> Order of magnitude reasoning	11
<i>B.C. Williams</i> A theory of interactions: unifying qualitative and quantitative algebraic reasoning	39
<i>B. Falkenhainer and K.D. Forbus</i> Compositional modeling: finding the right model for the job	95
<i>S. Addanki, R. Cremonini and J.S. Penberthy</i> Graphs of models	145
<i>K.M.-K. Yip</i> Understanding complex dynamics by visual and symbolic reasoning	179
<i>W.C. Hamscher</i> Modeling digital circuits for troubleshooting	223
<i>D. DeCoste</i> Dynamic across-time measurement interpretation	273
<i>B.J. Kuipers, C. Chiu, D.T. Dalle Molle and D.R. Throop</i> Higher-order derivative constraints in qualitative simulation	343
<i>L. Joskowicz and E.P. Sacks</i> Computational kinematics	381
<i>K.D. Forbus, P. Nielsen and B. Faltings</i> Qualitative spatial reasoning: the CLOCK project	417
Author Index	473

*Pages 1-471 were prepared with L^AT_EX.
